

**Verbal & Non-Verbal Reasoning – Paper 10****Beginner time limit: 30 minutes****Intermediate time limit: 25 minutes****Expert time limit: 20 minutes**

Don't just *do* these questions: **learn everything you can from them**, using the solution pages which follow (**pages 10-18**). The key techniques are explained there in detail.

Remember that you will never know every word in English. The people who do best in verbal reasoning are those who can deal skilfully with *unfamiliar* words.

Rather than trying to memorise each new word and every kind of picture pattern, focus on improving **how you think logically about the questions**.

No single 11 Plus Lifeline paper will contain every possible kind of reasoning question. However, once you have completed a number of these papers, you will be very well prepared for most of the question styles which are likely to appear in any 11-plus exam.

Practise **skipping and circling**: if a question seems likely to take time, skip it, circle the question number, and come back to it when you have done the rest.

---

**Fill in the gaps so that the word on the right has the same (or almost the same) meaning as the word on the left.**

**Example:**

Q. rest

repose

1. keep

\_\_et\_\_ \_\_n

2. disgusting

\_\_ \_\_pu\_\_ \_\_ \_\_v\_\_

3. glut

\_\_ \_\_rp\_\_ \_\_s

4. enthralling

c\_\_ \_\_t\_\_v\_\_ \_\_ \_\_ \_\_g

5. allocate

as\_\_ \_\_ \_\_n

Underline the word on the right which would belong with the words in either set of brackets.

**Example:**

Q. (attach, glue) (stay, remain) adhere endure stick fasten

6. (speech, talk) (location, place) discourse address oration put
7. (leaf, twig) (miaow, grunt) branch honk bark caw
8. (round, rotary) (letter, communication) circular rotund missive email
9. (tonne, ounce) (thump, beat) inch yard pound whack
10. (stem, trunk) (tail, follow) stalk pole harrass twig

Which option on the right is a top-down 2D view of the 3D figure on the left?

**Example:**

11.

12.

**a**

☐

**b**

☐

**c**

☐

**d**

☐

13.

**a**

☐

**b**

☐

**c**

☐

**d**

☐

14.

**a**

☐

**b**

☐

**c**

☐

**d**

☐

15.

**a**

☐

**b**

☐

**c**

☐

**d**

☐

Each one of the five words matches one of the number codes listed below. Write the correct word next to each number code. Each single-digit number always represents the same letter.

FAST

LAZE

WELT

SALE

SLOW

16. 2 5 3 8 \_\_\_\_\_

17. 3 9 4 1 \_\_\_\_\_

18. 9 5 7 6 \_\_\_\_\_

19. 3 5 9 6 \_\_\_\_\_

20. 1 6 9 8 \_\_\_\_\_

---

In the gap, write two letters which can end the first word and begin the second word.

**Example:**

Q. fly e r rant

21. penc \_\_\_\_\_ lustrate

22. cru \_\_\_\_\_ aler

23. ira \_\_\_\_\_ ar

24. so \_\_\_\_\_ me

25. he \_\_\_\_\_ my

Select the option which is most like the two pictures on the left.

Example:

26.

27.

28.

29.

30.

In each of these sentences there is a hidden four-letter word, which overlaps the end of one word and the beginning of the next. Write it in the answer space.

**Example:**

Q. Don't start entering the pool until I tell you! tent

31. The pink pentagon glistens in the gloaming. \_\_\_\_\_
32. The crab entertained five flustered acrobats. \_\_\_\_\_
33. Windows ended the dominance of DOS computing. \_\_\_\_\_
34. I liked my garden till the cows trampled through it. \_\_\_\_\_
35. The wounded slug lumbered away from the scene. \_\_\_\_\_

Fill in the gaps so that the word on the right has the opposite (or almost the opposite) meaning to the word on the left.

Example:

Q. rest

activity

36. sure

u \_ c \_ \_ t \_ \_ \_

37. sad

\_ h e \_ \_ f \_ \_

38. scarce

a b \_ \_ d \_ \_ \_

39. refuse

\_ c c \_ \_ \_

40. accidental

i n \_ \_ \_ \_ \_ a l

Choose the figure on the right which is a reflection in the dotted line of the figure on the left.

Example:

41.

42.

43.

44.

45.

Underline the word on the right which is closest to having an opposite meaning to the word on the left.

Example:

- |    |       |                |      |           |         |
|----|-------|----------------|------|-----------|---------|
| Q. | close | <u>distant</u> | near | proximate | awkward |
|----|-------|----------------|------|-----------|---------|
- 
- |     |           |           |           |           |              |
|-----|-----------|-----------|-----------|-----------|--------------|
| 46. | imaginary | pretend   | real      | effective | hypothetical |
| 47. | familiar  | relative  | unrelated | unknown   | different    |
| 48. | weaken    | reinforce | undermine | monthly   | contribute   |
| 49. | secure    | lock      | complex   | control   | uncertain    |
| 50. | sombre    | gloomy    | cheerful  | pink      | loud         |

---

**TOTAL MARKS: 50**

---

### Solutions

*You will find a dictionary useful as you review your answers.*

**Fill in the gaps so that the word on the right has the same (or almost the same) meaning as the word on the left.**

- |    |            |                                  |
|----|------------|----------------------------------|
| 1. | keep       | <u>re</u> <u>tain</u>            |
| 2. | disgusting | <u>re</u> <u>pul</u> <u>sive</u> |
| 3. | glut       | <u>sur</u> <u>plus</u>           |

Number 3 is the kind of difficult question that it can be best to skip over and return to when you've completed the rest of the paper.

However, you will get a good head-start if you notice that "glut" can be a verb or, as here, a noun.

Try to work out all the possible parts of speech that a word could be before you disappear into the question!

- |    |             |                                    |
|----|-------------|------------------------------------|
| 4. | enthralling | <u>cap</u> <u>tiv</u> <u>ating</u> |
| 5. | allocate    | ass <u>ign</u>                     |

**Underline the word on the right which would belong with the words in either set of brackets.**

- |    |                 |                         |                 |                |             |       |
|----|-----------------|-------------------------|-----------------|----------------|-------------|-------|
| 6. | (speech, talk)  | (location, place)       | discourse       | <u>address</u> | oration     | put   |
| 7. | (leaf, twig)    | (miaow, grunt)          | branch          | honk           | <u>bark</u> | caw   |
| 8. | (round, rotary) | (letter, communication) | <u>circular</u> | rotund         | missive     | email |

If you don't know all the meanings of a word such as "circular", you may still get the answer if you eliminate all the possibilities that you are fairly sure are wrong.

As mentioned above, consider whether a word can be, as here, both a noun and an adjective (for example).

- |     |                |                |              |      |              |       |
|-----|----------------|----------------|--------------|------|--------------|-------|
| 9.  | (tonne, ounce) | (thump, beat)  | inch         | yard | <u>pound</u> | whack |
| 10. | (stem, trunk)  | (tail, follow) | <u>stalk</u> | pole | harrass      | twig  |

Which option on the right is a top-down 2D view of the 3D figure on the left?

11.

Look carefully to see whether there is anything behind the front layer of blocks. In this case, there is not.

12.

Look carefully at the block underneath the 3D figure, and you'll see that it ought not to be visible from above.

13.

You need to think very closely about this one, counting blocks in each part of the 3D figure.

14.

Don't let yourself be tricked! Your job is to imagine the figure **from above**.

15.

As with 14, look very carefully. You'll see that all the blocks touch edge-to-edge: not corner to corner.

Each one of the five words matches one of the number codes listed below. Write the correct word next to each number code. Each single-digit number always represents the same letter.

	FAST	LAZE	WELT	SALE	SLOW
16.	2 5 3 8	<i>FAST</i>			
17.	3 9 4 1	<i>SLOW</i>			
18.	9 5 7 6	<i>LAZE</i>			
19.	3 5 9 6	<i>SALE</i>			
20.	1 6 9 8	<i>WELT</i>			

Two words begin with "S" and two number codes begin with 3, so S = 3.

The only other number in common between these two words is "9", which must be "L".

This means that "SLOW" must be 3 9 4 1 and "SALE" must be 3 5 9 6.

From this point, it's easy to fill in the rest of the combinations:

FAST	LAZE	WELT	SALE	SLOW
2 5 3 8	4 5 7 6	1 6 9 8	3 5 9 6	3 9 4 1

In the gap, write two letters which can end the first word and begin the second word.

21. penc i l lustrate

22. cru d e aler

23. ira t e ar

24. so f a me or so d a me

25. he a r my

If a question of this kind is difficult, switch frequently between focusing on the first word and on the second. Sometimes it is even good to 'zoom out' and focus a little less!

If you come back to one of these questions when you have time at the end of the test, there's nothing wrong with working through the alphabet, to see whether it throws up an idea.

Select the option which is most like the two pictures on the left.

26.

This is simpler than it looks. Just consider the pattern inside the shape, and the fact that the gridlines are diagonal.

27.

You can see from the shapes on the left that whether the stars are more inside or more outside the other shape does not matter, and that whether or not they are regular does not matter either.

All that matters is whether the star breaks the other shape's black border in exactly two places.

28.

All that matters is that the outer shape must be a triangle.

29.

The triangle must be **scalene**: its sides must all be of different lengths.

30.

The inner shape needs to have 6 sides.

In each of these sentences there is a hidden four-letter word, which overlaps the end of one word and the beginning of the next. Write it in the answer space.

31. The pink pentagon glistens in the gloaming. gong

32. The crab entertained five flustered acrobats. bent

33. Windows ended the dominance of DOS computing. send

Sometimes more complex words are misleading: the answer is actually hidden between some of the simpler words in the sentence.

34. I liked my garden till the cows trampled through it. dent
35. The wounded slug lumbered away from the scene. glum

Fill in the gaps so that the word on the right has the opposite (or almost the opposite) meaning to the word on the left.

36. sure                      uncertain
37. sad                      cheerful
38. scarce                      abundant
39. refuse                      accept
40. accidental                      intentional

If the worst comes to the worst, return to a word when you've done everything else in the paper and work quickly through the alphabet as you consider one of its gaps.

Choose the figure on the right which is a reflection in the dotted line of the figure on the left.

41.

Consider the exact location of each colour, and details such as whether points are curved or sharp.

42.

43.

44.

45.

Underline the word on the right which is closest to having an opposite meaning to the word on the left.

46. **imaginary** pretend real effective hypothetical

47. **familiar** relative unrelated unknown different

Be careful: things can be “different” from one another, but still be “familiar” to you; or two people can be different from one another, but know each other well.

“Unrelated” has a similar meaning to “different”.

48. **weaken** reinforce undermine monthly contribute

49. **secure** lock complex control uncertain

The word “lock” is there to convince you that “secure” is a verb (“I must secure the Prime Minister’s hotel room”). In fact it is an adjective, contrasting with “uncertain”.

50. **sombre** gloomy cheerful pink loud

END
