ENGLISH
(30 minutes)

Comprehension: Read this passage carefully, then answer the questions that follow. Text adapted from Treasure Island by Robert Louis Stevenson, which is in the public domain.

- 1 It was not very long after this that there occurred the first of the mysterious events that rid us at last of the captain, though not, as you will see, of his affairs. It was a bitter cold winter, with long, hard frosts and heavy gales; and it was plain from the first that my poor father was little likely to see the spring. He sank
5 daily, and my mother and I had all the inn upon our hands; and were kept busy enough, without paying much regard to our unpleasant guest.

- It was one January morning, very early - a pinching, frosty morning - the cove all grey with hoar-frost, the ripple lapping softly on the stones, the sun still low and only touching the hilltops and shining far to seaward. The captain had risen
10 earlier than usual, and set out down the beach, his cutlass swinging under the broad skirts of the old blue coat, his brass telescope under his arm, his hat tilted back upon his head. I remember his breath hanging like smoke in his wake as he strode off, and the last sound I heard of him, as he turned the big rock, was a loud snort of indignation, as though his mind was still running upon Dr. Livesey.

- 15 Well, mother was upstairs with father; and I was laying the breakfast-table against the captain's return, when the parlour door opened, and a man stepped in on whom I had never set my eyes before. He was a pale, tallowy creature, wanting two fingers of the left hand; and, though he wore a cutlass, he did not look much like a fighter. I had always my eye open for seafaring men, with one
20 leg or two, and I remember this one puzzled me. He was not sailorly, and yet he had a smack of the sea about him too.

I asked him what was for his service, and he said he would take rum; but as I was going out of the room to fetch it he sat down upon a table, and motioned me to draw near. I paused where I was, with my napkin in my hand.

- 25 "Come here, sonny," says he. "Come nearer here."

I took a step nearer.

"Is this here table for my mate Bill?" he asked, with a kind of leer.

I told him I did not know his mate Bill; and this was for a person who stayed in our house, whom we called the captain.

- 30 "Well," said he, "my mate Bill would be called the captain, as like as not. He has a cut on one cheek, and a mighty pleasant way with him, particularly in drink, has my mate Bill. We'll put it, for argument like, that your captain has a cut on one cheek and we'll put it, if you like, that that cheek's the right one. Ah, well! I told you. Now, is my mate Bill in this here house?"

35 I told him he was out walking.

"Which way, sonny? Which way is he gone?"

And when I had pointed out the rock and told him how the captain was likely to return, and how soon, and answered a few other questions, "Ah," said he, "this'll be as good as drink to my mate Bill."

40 The expression of his face as he said these words was not at all pleasant, and I had my own reasons for thinking that the stranger was mistaken, even supposing he meant what he said. But it was no affair of mine, I thought; and, besides, it was difficult to know what to do. The stranger kept hanging about just inside the inn door, peering round the corner like a cat waiting for a mouse.

45 Once I stepped out myself into the road, but he immediately called me back, and, as I did not obey quick enough for his fancy, a most horrible change came over his tallowy face, and he ordered me in, with an oath that made me jump. As soon as I was back again he returned to his former manner, half fawning, half sneering, patted me on the shoulder, told me I was a good boy, and he had
50 taken quite a fancy to me. "I have a son of my own," he said, "as like you as two blocks, and he's all the pride of my 'art. But the great thing for boys is discipline, sonny, discipline. Now, if you had sailed along of Bill, you wouldn't have stood there to be spoke to twice - not you. That was never Bill's way, nor the way of such as sailed with him.

55 So saying, the stranger backed along with me into the parlour, and put me behind him in the corner, so that we were both hidden by the open door. I was very uneasy and alarmed, as you may fancy, and it rather added to my fears to observe that the stranger was certainly frightened himself. He cleared the hilt of his cutlass and loosened the blade in the sheath; and all the time we were
60 waiting there he kept swallowing as if he felt what we used to call a lump in the throat.

At last in strode the captain, slammed the door behind him, without looking to the right or left, and marched straight across the room to where his breakfast awaited him.

65 "Bill," said the stranger, in a voice that I thought he had tried to make bold and big.

The captain spun round on his heel and fronted us; all the colour had gone out of his face; he had the look of a man who sees a ghost, or the evil one, or something worse, if anything can be; and, upon my word, I felt sorry to see him, all in a moment, turn so old and sick.

1. What sort of winter had it been?

- A 64° B 56° C 54° D 58° E 44°

25. Jack plays for the local football team. In the last six seasons he has scored 9, 0, 5, 12, 0 and 10 goals. How many goals will he need to score next season to make his annual average of goals exactly 7 goals?

- A 9 B 13 C 12 D 10 E 20

26. In the question above (Q25), what is the mode number of goals in a year that Jack scores?

- A 12 B 5 C 7 D 0 E 3

27. The cost of going to the cinema can be expressed in pounds as $15F + 4.5G$ where F = the number of adults and G = the number of children. If a family of 4 adults and 4 children go to the match, how much will it cost in total?

A £75 B £78 C £76.50 D £80 E £74

28. If a cup holds 600ml, how many cups would it take to fill a 12 litre bottle?

A 20 B 2 C 200 D 2,000 E 0.2

29. Four children were asked how many games they had played and the answers represented in this pictogram. What is the mean number of games the children had played?

Key:  = 20 games

A 4 B 40 C 400 D 15 E 20

30. Mushtaq leaves his house at 7:24am. He arrives at school at 7:54am. If he was travelling at 8 miles an hour, how far is it from his house to his school?

A 8 miles B 2 miles C 4 miles D 6 miles E 3 miles

31. My friends and I split our sweets into the ratio 9:8:7 with Robert getting the most sweets, Ali the next highest amount and me the least. If we had 192 sweets between us, how many sweets did I end up with?
- A 7 B 63 C 56 D 45 E 46
32. What is the size of an interior angle of a regular hexagon?
- A 90° B 60° C 120° D 115° E 135°
33. Add the two perfect numbers between 1 and 40. What do you get?
- A 34 B 41 C 36 D 54 E 3
34. What is the Highest Common Factor of 126 and 420?
- A 420 B 126 C 42 D 64 E 63
35. Jim tosses a coin five times and it lands Heads every time. What is the possibility it will land on Heads on the sixth time?
- A 50% B 10% C 18% D 25% E 12.5%
36. What is 124,505 rounded to the nearest ten?
- A 124,000 B 124,500 C 124,510 D 120,000 E 125,000
37. There are 14 pounds in a stone and approximately 454g in a pound. If I weigh 12 stone 7 ounces, what is my approximate weight in kg?
- A 79.45kg B 794.5kg C 7.945kg D 65.45kg E 654.5kg

38. What is seventeen multiplied by thirteen?

- A** 213 **B** 221 **C** 220 **D** 224 **E** 240

39. Colin is looking at a square. It has a side length of $12y$. What is the area of the square?

- A** $12y^2$ **B** $144y^2$ **C** $48y$ **D** $48y^2$ **E** $144y$

40. If $29.47 \times 64.03 = 1886.9641$, what is 0.2947×0.6403 ?

- A** 1.8869541 **B** 0.18869641 **C** 18.869641 **D** 188.69641 **E** 1886.9641

Non-Verbal Reasoning

Section 1

1. E
symmetry – each picture has three straight lines, two identical small shapes and one line of symmetry.
2. B
shape/position – each picture contains three small shapes inside a large shape: there is always a small white circle and a small white triangle; shape/shading – each picture contains a small black shape that is a smaller version of the large shape.
3. D
shape/number – each picture contains a circle and a square that are connected by three straight lines to a side of the square.
4. C
shape/shading – each large shape contains a small black triangle and a small white circle; position/shading – a third medium-sized shape overlaps the large outer shape once; the section of the shape that overlaps is shaded in the opposite colour to the section that is outside the large shape.
5. A
number – each large shape is made up of six lines. Distractors: shape – the small shape is unimportant; line style – the line style of the large shape is unimportant.
6. B
proportion – one-third of each picture contains a pattern or shading.
7. D
shape – each picture contains a triangle.
8. D
position – each picture contains an arrowhead that is fully enclosed by a straight line on each side; direction – the arrow points towards the middle line of this enclosure.

Section 2

1. E
rotation – the whole picture rotates 180° ; line style – the large 'L' shape and the small 'L' shape swap line styles; direction – the arrow flips 180° .
2. D
rotation – the whole picture rotates 90° anticlockwise; shading/line style – the large shape adopts the shading pattern of the small shape on the right and the small shape on the right adopts the shading pattern/line style of the large shape; position/size – the small shape on the left moves inside the small shape on the right, with both increasing in size.
3. B
position/size – the three small shapes at the top of the picture increase in size and move inside each other; shading – the central shape then takes its shading from the shape at the base of the original picture; line style – the middle-sized shape adopts its line style from the original far right small shape and the largest of the new shapes takes its line style from the vertical rule.
4. A
size/position/shading – the new bottom shape is taken from the centre right shape, which increases in size and adopts the shading colour/pattern of the shape on the left; the outer shape above is taken from the middle left shape, increasing in size with its shading pattern removed; the bottom shape in the original picture decreases in size, moves to the centre of the new top shape and adopts the shading colour/pattern of the original centre right shape; reflection/position – the top shape in the original picture reflects on the

horizontal then moves inside the new top shape.

5. B
line style – the top left corner line and the bottom right corner line switch line styles;
shape/proportion – the top left corner line (proportion of a regular shape) expands to form the whole shape; the bottom right corner line (proportion of a regular shape) expands to form the whole shape; shading – the small bottom
6. D size/proportion – the bottom large shape increases in size but then its top half is removed; shading – the top left circle adopts the colour/pattern of the top right triangle; rotation – the line rotates 135° anticlockwise; translation/position – the line moves to sit on top of the large shape (with a slight overlap) and the circle moves to the centre of the line.
7. C shading – the small rectangle on the left and the small rectangle on the right switch shading patterns; reflection – the triangular shape flips on a horizontal plane; size – the triangular shape increases in size, covering most of the original large shape.
8. E
size/position – the large shape and the small shape swap places: the large shape decreases in size to become the inner shape and the small shape increases in size to become the outer shape; shading/pattern – both shapes retain their shading.
